ALBANY AFFAIRS.

How the Organization Was
Brought About.

(Special to the Buffalo Courier)

ALBANY, Feb. 15th.—At a caucus
of the democratic senators this after-
noon E. A. Moore was nominated for
segeant-at-arms, C. S. Macomber
for postmaster, and Mr Ruso
for stenographer, but probably nothing
will be done in the way of
electing these nominees to-morrow.
The vote giving Mr. Hoskins the
appointment of the senate commit-
tee to-day is not of any force, be-
cause seventeen senators are required
to change a rule and only fourteen
voted for it, though there is some
disposition to give him the
power to-morrow. I believe that
Tammany has no plan prepared for
to-morrow, and probably not much
in the way of further election of
officers of the senate or assembly will
be done. The Tammany man-
agers have gone to the theatre, as
they usually do after carrying a
point, and there is no one at their
headquarters to be questioned.—
Belden of Syracuse, and one or two
other Republican wirepullers arrang-
ed with Tammany this morning for
the election of Johnson as clerk. The
trade for the other officers is
probably not completed. Johnson's
election carries with it the appoint-
ment of a dozen deputy clerks, who
will of course be Republicans, with
salaries of from fifteen hundred to
two thousand dollars. There are
serious efforts to drum up votes
of Republicans and Tammany men
enough to remove Speaker Patter-
son and elect a simon-pure Tam-
manyite or Republican in his place,
but this will hardly succeed.

Wheat Still Declining.

CHICAGO, Feb. 15.—There was
very active trading to-day, and the
condition of affairs is simply pan-
icky. Wheat declined heavily, clos-
ing from four to five cents below yester-
day's highest. Corn is about two
cents lower, oats a cent off, and pro-
visions indescribably irregular, with
a decline for the day of about a
dollar and a quarter on pork and 60
cents on lard. There has not been
so exciting a day on 'Change for
over a year.

Closing prices were considerably
firmer than the lowest. It is be-
lieved Kenyon & Co. were "long"
on from 4,000,000 to 5,000,000
bushels of wheat. It is thought the
greater portion was owned for the
recent successful Cincinnati clique.

The heavy selling movement in
all markets was influenced largely
by the spring-like weather. On call
was a scene of great excitement.—
B'locks of a quarter million bushels
of wheat were sold at one time, and
there were few sales in less than
100,000 bushel lots. The record-
ers were unable to take down the
sales as fast as made and the fines
imposed for an improper display of
anxiety on the part of bidders
amounted to a fair day's commis-
sions.

The chief cause of the decline
was the failure of H. O. Kenyon &
Co., a commission firm which has
an extensive trade.

Dog Suicide.

Spitz Ballard the other day, del-
iberately walked into the Oatka,
where the ice men had been seen
getting out for storage. The stream
was swollen by the rains, and conse-
quently the current took the proud
growler under and away beyond
reach. Spitz was a learned dog—
could be seen any day carrying the
Buffalo Courier from the postoffice
to his master's home. He was a
mail-carrier of the Star-route persua-
sion, and perhaps it was from an
awakened sense of the fact that he
suicided.—Le Roy Gazette.

ed for the crime.

The question of healthfulness re-
garding the Baking Powder we use,
is an important one. The result of
a pure and healthy article is more
satisfactory, although it may not be
as profitable to the manufacturer.

contains no deleterious substance,

HIS SUCCESSOR'S TRIBUTE.

Mr. Holmes' Eulogy on Hon.
John Sanders.

At the memorial services on Mon-
day evening, Assemblyman Holmes
of Genesee, said: "Mr. Speaker:
As the successor of Mr. Sanders in
the Assembly it became my duty to
offer the resolutions, in reference to
his death, which have been read.
John Sanders was born in Devon-
shire, England, February 20th,
1822, and received in that country
a common school education. He
came to this country in 1841, since
which time he had been a promi-
nent citizen of Genesee county. He
was formerly a Whig, but had been
identified as an active and earnest
worker in the Republican party from
the time of its organization.

For several years before his death
we had been acquaintances and
friends. To know him was to es-
teem him, not only as an honorable,
upright, square business man, but
as a kind and true friend in all the
relations of life. In the county of
Genesee, where he so long resided,
Mr. Sanders was generally known
and universally liked. He was the
friend and helper of the poor and
generous to a fault. His memory
will ever be green. Not only will
his stricken family mourn him and
the church of which he had been an
officer and faithful communicant for
nearly thirty years, but the business
community, extending far beyond
the limits of his own county,
the poor, the unfortunate, all
will miss him and long remem-
ber him as a kind and indulgent
husband and father in the family
circles, as a good citizen and neigh-
bor, who aimed to be guided by the
golden rule in all his dealings
among men.

He had occupied positions of
honor and trust in his county be-
fore his election as a member of the
assembly, and when he came before
the people of his county as a candi-
date for representative in this branch
of the legislature he was no stranger,
but known and trusted of all. Dur-
ing the two terms (1879 and 1880)
he was their representative here, all
of you who were then members
knew him, and it is a gratification
to me, as I know it is to his family
and friends at home, to be asured
of the kindly regard in which he was
held here. I trust, Mr. Speaker,
the resolutions may be adopted."

The Great Ice Bridge.

The large quantities of ice that
have passed over Niagara Falls dur-
ing the last twenty-four hours, writes
the correspondent of the Buffalo
Courier, have enlarged the ice
bridge to an extent hitherto un-
known. It is now over a mile in
length, and extends from the Horse-
shoe falls to the old Suspension
bridge. The river was very high
this morning, and the immense vol-
um of water rushing over the falls,
unable to find sufficient outlet be-
neath the vast ice-field, rushed com-
pletely over it, flooding the platform
at the foot of the inclined plane,
and producing a rushing sound
which drowned the roar of the falls.
No barrier that any human ingenu-
ity could devise could for one mo-
ment withstand the terrific current
which surges against it; but the pres-
ent structure, instead of being weak-
ened by the warm weather and the
many other obstacles that it had to
contend with, has grown in strength,
and weeks of summer weather will
have little effect upon it.

MISS J. F. KENYON.

Dancing at a Donation Party.

The Rev. William Dayton preach-
es in the Methodist Church in Bor-
den Valley a rural parish near the
village of Avoca Steuben county.
On Wednesday evening last a dona-
tion party was given to the pastor at
the house of Charles Shults, a mem-
ber of the church and a class leader.
The pastor was present and smiled
on the festivities, until one of the
elder sisters informed him that a
party of young people was dancing
in another part of the house. The
pastor at once sought Brother Shults
and recommended him for permit-
ting a dance at a donation party, and
assured him that unless it was stop-
ped he (the pastor) would not touch
one penny of the proceeds of the do-
nation, and would leave the house
immediately. Brother Shults went
out. Soon afterward he told Brother
Dayton that he had placed an in-
junction on the dance. Brother
Dayton stayed the party out, and
took with him \$63 as the proceeds
of the evening. Two days after-
ward he learned that Brother Shults
had not stopped the dance, and that
it was kept up until daylight. The
pastor sent the \$63 back to the com-
mittee, with the request that it be
returned to the donors. The de-
ception of Brother Shults has aroused
a strong feeling in the Borden
Valley church, and he is to be dis-
ciplined.

—A new style of switch engine is
being constructed for the Central
railroad company. It has been
found that old engines of the com-
mon build do not answer the pur-
poses of switching, and new ones
will be so constructed that the
weight of the engine will be on the
drivers, making them of more pow-
erful traction. Two are now being
built in the Buffalo shops and sev-
eral in the Albany shops.

The Stove manufacturers' Con-
