NEW CADILLAC FEATURES.

Rumors of Changes Confirmed by Advertisement in The News Today.

Inquiries resulting from current rumors to the effect that the Cadillac Motor Car Company is in possession of a new engineering principle in automotive engine design are substantiated by the announcement in the advertising columns of The News today.

Cadillac developments are considered especially significant by students of motor car progress because of the interesting engineering and manufacturing history of the company. The Dewar trophy, awarded each year by the Royal Automobile Club of England for the most significant motor car development of the year, was won in 1908 by Cadillac cars, as the first to develop a high degree of standardization. That is, they were cars in which because of accurate machining, all parts are exact duplicates of other parts of the same kind, and can be used interchangeably without fitting. In 1912 the Cadillac control of circulating cooling medium; and first to incorporate thermostatic control of carburetion.

The Cadillac company was also first to market a quality car manufactured upon a quantity basis; and more than 100,000 of its V-type, eight cylinder cars are now in operation many of them having entered their tenth year of service.

Burt W. Welch, No. 233 West Main street, is the Cadillac representative in this territory.

WOMEN OF MIDDLE AGE

Much Interest Being Shown in the Large Number of Women Safely Carried Through the Change of Life by Lydia E. Pinkham's Vegetable Compound

The Following Letters Are Impressive

Owing to modern methods of living, few women approach this perfectly natural change without experiencing very annoying and often painful symptoms. Those distressful hot flashes, nervousness, headaches, melancholia and irritability are only a few of the symptoms incident to this trying period of a woman's life, and the following letters prove the value of Lydia E. Pinkham's Vegetable Compound to overcome these abnormal conditions.

"Fisherville, Ky.—For several months I was under the doctor's care as he said my nervousness, chills, hot flashes and weakness were caused by the Change of Life, but I didn't seem to get any better. I was not able to work and spent most of my time in bed. A friend called to see me and asked me to try Lydia E. Pinkham's Vegetable Compound, and I cannot tell you how much good the medicine did me, as I had such a hard time before taking it. I can only advise every woman passing through the Change of Life to take Lydia E. Pinkham's Vegetable Compound, as it did so much for me."—Mrs. EDWARD B. NEAL, Star Route, Fisherville, Ky.
