TWO-SIDED COINS The Elliott Coalition, an organization of 20 agencies, including almost every association that has contact with residents of the area, in one way or another, is now in operation.

The organization may be the answer to aid in solving some of the social and racial problems that have plagued the area from the time it began to change hands a few decades ago, until now.

The assignment, judging from past experience, is not going to be easy and should be approached from a two-way program of criticism and action from within, as well as without. This means that the evils caused by actions of other groups who cannot be pointed out and resolved.

This does not mean that because of these inequalities, that our group should use this as a reason of self-isolation to separate, isolate itself, prite, conceptions and common goals.

With attainment of more rights and opportunity, led to good use and purpose, more than likely, the Elliott Coalition will do the job which up until now, has been more or less a one-sided affair. The old saying that there are two sides to each coin, certainly holds true in the program of improving conditions in the ghettos or inner-cities.

THE PRESIDENT

There has been much criticism of President Nixon concerning his handling of the school problem. However, from my view on the bridge, I find his reasoning competent as well as practical.

Many considered black statement who would do it themselves men of wisdom, would do it to secure a page from the President's book of Honor, Judgment and Expedient thought.

President Nixon is faced with every type of black-white endeavor, every type of discriminatory behavior, every type of policy, raising its own demands for justification.

Frankly speaking, many intelligent white men as well as black men, including myself, view America as headed for disaster, should the present in following her present domestic and world policy.

Our churches, lodges and various other meeting halls can no longer be maintained only as places of moaning and groaning, eating and drinking, or avatars of incompetent, useless fund-raising.

The meaningless hedge card party and chicken fry has had its day. We as black adults, big job, America! A job, if not done, will offer small comfort to those of us who indulge in the national pastime of charging all of our ill fortune to the Great White Father in the White House.

The murder of Martin Luther King, as well as a many other outstanding black leaders, should have become our signal to cross the Rubicon. All the black man really has going for him in America is his faith in the Supreme Being and a real dependence on his own effort.

All he truly needs is the blessings of the Supreme Being and faith in his own efforts. However ill or impractical this statement may appear, it nevertheless is, and will prove to be, most correct and deadly truthful.

Let black men say to the President of the United States, 'We wish you well. We thank you for any sincere effort you offer in our behalf. But as of this day and critical period, we must be about our Father's business... Which in the final attempt to survive, is the only worthwhile business of mankind in general.
