Probable Prevention

In our opinion, one of the best actions planned for the inner-city, is the Neighborhood Caucus, sponsored by the residents and professionals in the Perry area.

The purpose of the meeting was to discuss problems and means to ease the tension, explore job opportunities, support supervised recreation for the children and tackle the problem of neighborhood unrest.

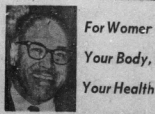

The meeting, held June 17th, in School No. 4, South Park and Louisiana Sts., featured leaders from community organizations, religious groups and the political field.

It is meetings of this type, where the public becomes familiar with the problems of the area and become acquainted with the residents therein. This could become the preventive measure to help keep the summer "cool."

As we see it, with many social and economic gains already in existence: Social Security, Unemployment Insurance, credit and loans, recreation, easier facilities for tutoring programs, Summer camps, better transportation and education, TV, etc., there should and ought to be less reason for dissatisfaction, destruction and crime, than during the times when these advantages were non-

existent. Then, crime statistics and tension were lower and there was no such thing as the recently coined phrase: "Hot Summer." Perhaps similar programs should be held in the several other areas of the huge minority community.

The Perry Residents and Professionals sponsored the Caucus and is to be congratulated for this approach to community problems and issues.

Quotations WITH A MEANING

From Various Authors
By ALMA BRIDGES

"If we as Christians give our Law one foot place in our lives, devotion and service, the world will see that we know him."

"There is need of personal retreat through self-meaning. No man can be a leader without it."

"Life lays on us heavy burdens, another person with small capacity is one third of his load, while the man with the larger soul bears his own burden, and still is able to bring others when strength is giving out."

"We are hellish, hounds for or against Christ. We as Christians serve people to Christ by our words and actions, or we rebel them by our indifference to him and our lack of interest in him."

"Institutions the Church hates that first she is to a meeting accepted. Instead of strutting forth arms of force that would stir men up and bring them in, often we have reached the ends and cost them out."

As reported to the House on Health and Education appropriations committee by the Administration. "It will take years to provide adequate public education in the United States."

In keeping with my determination to provide means for quality education for children of poor and low income families instead of sending them across the district line, I have thought that an amendment by Rep. William H. Rosten (D-Ill.) which would appropriate \$40 million more for quality education than the amount requested by the Administration and the Appropriations Committee, is a must. Keep it elected!

An article of the second series of my annual report, 1953 will be published in 1954 edition, expected for Buffalo schools in 1953.
