FOR CITY, TOWN, VILLAGE OFFICIALS, ASSESSORS

Regan Sets June 9 For Informal Conference

County Executive Edward V. Regan has announced that his staff, in conjunction with representatives of the Erie County Legislature, will hold an informal conference on Friday, June 9 from 9:30 a.m. to 5 p.m. at the Erie County College, South Campus.

The purpose of the conference is to bring together elected officials from the various towns, villages and cities in Erie County, and village officials as well as appointed assessors so as certain areas of County government can be explained.

The specific areas to be covered include, the role of the Department of Central Police Services and Radio, and how the dispatching programs, networks among radios, and technology and property reassessment.

Erie County officials will give short presentations following their answers to each of the questions submitted by the local officials in preparation for each topic discussed.

Mr. Regan said he hopes to be able to hold similar programs in several areas of public service. This conference is just one of the continuous efforts to get the officials and people of the area informed and to keep the public aware of what county government is doing. Informational activities can have a direct bearing on the quality of village policy, and, for this reason, we hope to see as many local officials as possible at the conference.

Boating Safety Information Available

The Boating Safety Division of the U.S. Coast Guard has available a number of free boating safety publications. Marine information services and boating courses are readily accessible to the boating public in the Buffalo area for all of 1969 years. Many radio stations, including the Buffalo National Weather Service's board facsimile broadcasts, provide boating safety information and a great number of radio stations broadcast boating safety information every year.

Despite safety improvements, there has been a trend in boating accidents. Last weekend Coast Guard assistance counted, a total of 1,000 boats. The Coast Guard assistance cases which were weekend-related rose from 3.7% in 1971 to 13.6% in 1972.

The Coast Guard advises boaters to obtain the weather report for their intended boating area before leaving. Broadcasts of weather reports are underway. If a storm is imminent, boaters should be extremely careful not to overestimate their ability to "ride it out."
