## Kiddie Cocktail May Lead To Early Drinking

Giving children a kiddie cocktail — a nonalcoholic blend of ginger ale, grenadine, and maraschino cherry juice which simulates the appearance of an adult cocktail — is encouraging them as children to consume alcoholic beverages as adults, Dr. Philip Roth, a psychiatrist, said recently. He urges children to adopt an adult habit, drinking, which is not good advice, especially for children. It's OK for children to drink soft drinks, but not to act as an imitation of adults in the manner reported by the kid cocktail drinkers.

"Don't make alcohol a symbol of being big," Roth suggests. "Children should be encouraged to participate in wholesome drug-free activities."
