For Women

Your Body, Your Health

By DR. F. J. CLARK

Dr. Clark's column is prepared with the cooperation of the American College of Obstetricians and Gynecologists. Letters and questions should be sent to: Dr. F. J. Clark, ACOG, 79 W. Monroe St., Chicago, Illinois 96053.

One of the wonderful things about the human body is its ability to resist disease. We see one form of this ability when a person has an illness like rubella, and then develops an immunity, which protects him against getting that disease again.

Vaccinations given to children and adults work the same way. What happens with both vaccinations is the natural form of immunity. FOR WOMEN, YOUR BODY — HEALTH (See page 7)
